# Introduction

We hereby present the components manual of the Intergas range of boilers. The included exploded views provide insight into the assembly of all Intergas HE models that are currently produced. The drawings are supplemented by parts lists giving the name and article number of the displayed components. The prices of all components are stated. These prices are gross recommended retail prices (per piece) excluding VAT, carriage and shipping costs.

State the article number and the description of the component in all your orders.

The prices are valid from 1 January 2005

## **Tips for use:**

The components are numbers in the drawings.

These numbers correspond with the position numbers in the table shown alongside the drawing.

The article number and description can be found in the table.
